

Construction/Renovation

Term	Definition/Description
REVIEW/ESTABLISH NEW DESIGN STANDARD FOR BLAST RESISTANCE	In smaller facilities or those that lease space, control over design standards may not be possible. However, future site selections should attempt to locate in facilities that do meet standards. New construction of government controlled facilities should review, establish, and implement new design standards for blast resistance.
ESTABLISH STREET SET-BACK FOR NEW CONSTRUCTION	Every foot between a potential bomb and a building will dramatically reduce damage and increase the survival rate. Street set-back is always desirable, but should be used in conjunction with barriers in Level IV and V facilities.
