

Table 1b. to Part 660, Subpart G--2005 OYs for minor rockfish by depth sub-groups (weights in metric tons).

Species	Total Catch ABC	OY (Total Catch)			Harvest Guidelines (total catch)			
		Total Catch OY	Recreational Estimate	Commercial HG for minor rockfish and depth sub-groups	Limited Entry		Open Access	
					Mt	%	Mt	%
Minor Rockfish North cc/	3,680	2,250	78	2,172	1,992	91.7	180	8.3
Nearshore		122	68	54				
Shelf		968	10	958				
Slope		1,160	0	1,160				
Minor Rockfish South dd/	3,412	1,968	443	1,390	774	55.7	616	44.3
Nearshore ii/		615	383	97				
Shelf		714	60	654				
Slope		639	0	639				

a/ ABCs apply to the U.S. portion of the Vancouver area, except as noted under individual species.

b/ Lingcod was declared overfished on March 3, 1999. A coastwide stock assessment was prepared in 2003. Lingcod was believed to be at 25 percent of its unfished biomass coastwide in 2002, 31 percent in the north and 19 percent in the south. The ABC projection for 2005 is 2,922 mt and was calculated using an  $F_{MSY}$  proxy of  $F_{45\%}$ . The total catch OY of 2,414 mt (the sum of 1,891 mt in the north and 612 mt in the south) was based on the rebuilding plan with a 70 percent probability of rebuilding the stock to  $B_{MSY}$  by the year 2009 ( $T_{MAX}$ ) then adjusted downward slightly (by 174 mt) to be equal to the 2006 OY value. The harvest control rule will be  $F=0.17$  in the north and  $F=0.15$  in the south. Out of the OY, it is estimated that 656 mt will be taken in the recreational fishery, 4.5 mt will be taken during research activity, and 2.8 mt will be taken in non-groundfish fisheries. Under the proposed regulations, it is currently anticipated that 274.2 mt will be taken in the commercial fisheries (which is being set as a commercial HG), leaving a residual amount of 1,476.5 mt to be used as necessary during the fishing year. There is a recreational harvest guideline of 234 mt for the area north of 42° N. Lat. and a recreational harvest guideline of 422 mt for the area south of 42° N. Lat. The tribes do not have a specific allocation at this time but are expected to take 25.1 mt of the commercial HG.

c/ "Other species", these are neither common nor important to the commercial and recreational fisheries in the areas footnoted. Accordingly, Pacific cod is included in the non-commercial HG of "other fish" and rockfish species are included in either "other rockfish" or "remaining rockfish" for the areas footnoted.
